

# INDOOR

## HVAC - CLEANROOM - CABIN AIR

SIFA offers a wide range of articles dedicated to match the most demanding requirements in the indoor sector.

This industry requires high standard of air purification efficiency obtainable only with quality materials and manufactures, quality that SIFA offers in its products for OEM and OES solutions.

### HVAC

Air treatment plays an increasingly important role in the everyday life of each of us. From work to leisure areas, special piping allows the installation of filters that purify air from pollutants.

### CLEANROOM

Very delicate environments such as operating rooms, electronics industry, pharmaceutical research laboratories, and microbiological testing centers require a high degree of protection for operators and surrounding environments.

Protection is obtained mainly through the air treatment that is carried out by special diffusion devices.

### CABIN AIR

In an environment that is getting more and more polluted, cabin filters protect us from external pathological environments, both inside the car, in the cabin of earthmoving machines or in chemical treatment equipment.

- Filter Media
- 100% Synthetic and PTFE Filter media
- Glass and Synthetic Filter media for Pockets
- Glass paint stop media
- Aluminum Frame
- Extruded Frames
- V-Banks frames
- Cenerable frame
- Polyurethanes
- Hot melt and high temp. glue
- Grids
- Bag-In Bag-Out (BIBO) & ducts
- Ceiling
- Terminal Unit
- Laminar wall diffusers
