

# LAMINAR WALL DIFFUSERS

**SIFATechnology**

Superior  
Integration in  
Filter  
Assembly

Powder coated Steel or Stainless steel (Aisi 304, 316, 316L).  
Disposable filters with Foamed or gel gaskets.  
Mono-block structure. Customizable layout and sizing

SIFA offers a wide range of articles dedicated to match the most demanding requirements in the indoor sector.

This industry requires high standard of air purification efficiency obtainable only with quality materials and manufactures, quality that SIFA offers in its products for OEM and OES solutions.

## Main applications

Used in environments where there is not enough space for installing a filtering ceiling.

Installed mainly in Cleanroom in the hospital sector and in research centers, these devices are capable of generating both a laminar and turbulent airflow as required.

The solution offered by SIFA allows easy replacement of individual filters either with polyurethane foam gasket or gel seal.

## LAMINAR WALL DIFFUSERS

---

They can also be manufactured in a modular version to facilitate long terminal installations in small spaces.
