

MELT BLOWN CARTRIDGES

Gasoline, Diesel & Oil

SIFA's flexibility enables world-wide approach, thanks to the wide range of products and solutions that SIFA offers in order to satisfy customers' needs.

start from 3µm up to 50µm.

Raw material, diameter and length are customized for different application.

Melt blown cartridges for water, crankcase, fuel, oil and gases in depth filtration technology. Gradient porous size allows long life and high DHC. The combination between particles filtration and coalesce properties makes this filter element suitable in diesel and oil filtration. 95% of water separation fundamentally in multijet power engine. The range
